

### **General Information**

The objective of the Journal of the Institute of Electronics and Information Engineers (called Journal of IEIE) is to provide an international forum for the publication and dissemination of original research results that contribute to the understanding of the fields of electrical, electronics, and computer engineering and science. The Journal is divided into the following six areas according to the subject: telecommunication, semiconductor & device, computer & information, signal processing, systems & control, and industrial electronics. The Journal of IEIE was recognized as the KCI (Korea Citation Index) Excellent Accredited Journal by the National Research Foundation of Korea in 2018 by considering its reputation within the academic community and KCI. The selection was one of the five journals in science and technology fields and the only one in our academic and research areas. The official title of the Journal (as ISO abbreviation of the journal-title) is “Journal of the Institute of Electronics and Information Engineers.”

Policies and ethics for publication are listed below. The topics for the policies and publication ethics include authorship, peer-review process, submitting original papers and plagiarism, archiving, fees, open access, duplicate publication, competing interests, publication malpractice, and conflicts of interest. All authors should be aware of and comply with the policies and ethics in publishing articles in the Journal of IEIE.

### **Authorship**

Authors are expected to be aware of and comply with the best practice in authorship. To avoid authorship issues such as ghost or guest authorship and make the author contributions transparent, biographies of all authors must be included after the references. It is expected that all authors have made significant contributions and are aware of and obliged to follow the listed policies on this page. At least one lead contact with the corresponding author should be stated in the submitting article. The corresponding author should be responsible for the supervision of the work, approval of all contents and the submission of the paper, appropriate authorship designation of all authors, and cooperation with the journal throughout the submission, review process, and after publication. For equal contributors, the authors must note this on the first page of the article.

### **Peer-review process**

All authors are obliged to participate in the peer-review process. All articles are subject to peer-review by at least two reviewers so that the authors obtain the advice of their manuscript from expert reviewers. The judgments made by these reviewers are to be objective, with no conflict of interest between the reviewer pool. In cases where the author has not cited the required references of published work, reviewers may notify the author of such an issue. All articles will be treated confidentially before publication.

### **Submitting Original Papers and Plagiarism**

The contents of the Journal of IEIE are peer-reviewed and archived. The authors must convince both peer reviewers and the editors of the scientific and technical merit of their paper. All authors should submit the manuscript containing the original content. We strictly prohibit plagiarism (reproduction of text from other articles without crediting the source) and self-plagiarism (production of a paper with the same content by the same authors). It is unethical to submit the same results to more than one journals simultaneously. However, the review article is an exception. If plagiarism is found in a paper in the review or in the publication process, the Steering Committee of the Journal of the IEIE will immediately investigate the case. The severe penalty will be imposed on the author(s) related to the plagiarism case based on the investigation.

### **Duplicate Publication**

An author should not publish the same research results in any other journal or primary publication. The manuscript which has not been simultaneously submitted to, nor published in any other publication channels, solely can be accepted. If the same paper is found appearing or published in any other publications, the paper will be rejected without any consideration. The paper previously published in other minor publications of an abstract form, academic thesis, and preprints (i.e., conference, workshop, seminar, or proceedings) can be eligible for being reviewed and published in this journal. However, we require that the paper be substantially revised with at least 30% new content, which has never been

published in the previous publications. Although new results are not required, the revised manuscript version should include distinct key ideas, examples, explanations, figures, tables, elaborations, etc. The manuscript should indicate its previously published conference name and date as a footnote in the bottom of the first page. The authors should briefly mention how the new submission offers substantial novel contributions beyond those of the previously published paper(s) or proceedings. In such cases, authors must include the details, explanation, and accessible information of such publications in the cover letter. Otherwise, the editorial members may reject the submission immediately or withdraw their decision to the article due to potential issues and conflict. The decision may also apply to cases of direct/indirect duplicate/multiple publication or concurrent submission.

### **Competing Interests**

As an integral part of the submission process, authors should declare any potential competing interests before any publication of the article. Competing interests include any financial affairs, personal relationships with other people or organizations, employment, grants for funding, and patent, that could influence the scope of their work. If you are requested to identify the funding source(s) or sponsor(s) for the research, these should be given a separate section, such as 'Acknowledgements.' For full official funding agencies, an abstract of the project name or grant numbers should be included. However, the funding agencies must approve these acknowledgment phrases before submission.

### **Publication Malpractice**

An author is obliged to promptly inform the journal editorial members or publisher of any fundamental errors or inaccuracy in his/her published paper. For such errors, an author must retract or correct the mistakes and notify at least one editorial member. The Journal of IEIE will publish corrections, clarifications, retractions, and apologies when needed. In cases where the referees or readers may question the research (i.e., manipulation of data or results), or any violation of the journal policies is found, the editorial members will inform the corresponding author, and likely inform the institution at which the research origins, and may withdraw the article. It is required that the author should provide the editorial members with reasonable explanations that are thoroughly investigated and confirmed.

### **Citation Manipulation**

Submitted manuscripts should not include citations to increase the number of citations to the authors' work, or articles published in a specific journal.

### **Editors and Reviewers**

Editors and reviewers should be excluded with a submission when they have a close personal connection to any author, share an affiliation with any author, recently have published/submitted a work with any author, have collaboration with any author, have a financial interest in the subject of the work, or are not able to be objective. The Journal of IEIE does not assign submissions to editors and reviewers having a conflict addressed above. Also, editors and reviewers must declare whether to have discussed a manuscript with its authors.

### **Archiving**

All articles of the Journal of IEIE are archived in RISS (Research Information Sharing Service, <http://www.riss.kr>), where they are also indexed in Korea Citation Index (KCI).

### **Copyright**

When the manuscripts are accepted to the Journal of IEIE, authors will be invited to complete a copyright license. The copyright of the accepted paper is assigned and transferred to the Institute of Electronics and Information Engineers (IEIE) for the full term; thereof, throughout the world, subject to the term of the agreement and acceptance. The IEIE shall have the right to publish the paper in any medium or form, or by any means, now known or later developed. However, the original authors retain the right to copy, translate, or modify their manuscripts. In cases when a manuscript is translated into another language or when any portion of the manuscript is to be submitted to another publication, the original manuscript should be clearly cited in the publications.

### **Processing and Publication Fees**

IEIE charges the processing fee 40,000 KRW and 100,000 KRW for regular and express papers, respectively. “The express paper” means requesting a quick review process.

The manuscripts will also be charged after acceptance for publication as follows.

Pages	Submission Fee	
	Regular Paper	Express Paper
5 ~ 6 pages	15,000 KRW per page	40,000 KRW per page
7 ~ 8 pages	30,000 KRW per page	50,000 KRW per page
9 ~ 12 pages	40,000 KRW per page	60,000 KRW per page
Acknowledgement per support agency	100,000 KRW additional fee	

If the authors of a paper include any single non-member author on the publication date, their contribution shall be subject to an additional 50% charge of the total publication fee written above.

### Open Access

This publication is an open-access journal. The published papers are freely available online to everyone at no charge ([http://www.theieie.org/pages\\_publication/ko\\_journal.vm](http://www.theieie.org/pages_publication/ko_journal.vm) for Korean and <http://journal.auric.kr/ieie> for English). Under the terms of the Creative Commons Attribution Non-Commercial License (<http://creativecommons.org/licenses/by-nc/3.0/>), IEIE agrees that anyone may reuse, copy, distribute published articles in whole or part for any purpose, for free, for non-commercial purposes as long as the authors and source are properly cited. The Journal of IEIE encourages authors that materials including data, code, and protocols associated with the research of the submitted article are made accessible to the public; however, this is not mandatory.

### Publishing History and Schedule

This journal was founded as “Proceedings of the Institute of Electronics Engineers of Korea” on October 25, 1963, and technical commentary and papers were published at that time. Since 1974, “Proceedings” for a research paper and “Magazines” for technical review had been published in separation. In 1986, the name “Proceedings” was changed to “Journal of the Institute of Electronics and Information Engineers.” The Journal of IEIE is published on the 25th day of each month.

### Manuscript Format

► The followings are manuscript format guidelines:

Items	Guidelines
Pages	5 and more pages within 12 pages, including figures, tables, and biographies.
Page size	21cm (width) x 29.7cm (height)
Column and line space	Double column page and single space.
Main context font size and style	10pt ShinMyungjo font only.
Main title and section title font size	20pt ShinMyungjo font for the Korean main title and 17pt ShinMyungjo font for the equivalent English main title. 11pt HYGoThic M font for the section titles.
Abstract	The font for the Abstract is the 10pt JoongGoThic M for Korean and 10pt BarTang for English. For the abstract, use 100~200 words in Korean (8.5pt ShinMyungjo) and English (8.5pt ShinMyungjo). An abstract must illustrate the nature, importance, and contributions of the paper. Do not include complex symbols, mathematical notations, or bibliographic references.
Author name and affiliation	The authors' names are formatted with 11.5pt ShinMyungjo font for Korean and ShinMyungjo font for English. Korean names and affiliations with English equivalents. The authors' affiliation should

	include e-mails and should be written in 9pt. Also, indicate the corresponding author with a symbol @ after the authors' affiliation.
<b>Keywords</b>	Provide 5 keywords that best describe the contents and address the critical issues of the paper. The given keywords are essential to finding appropriate reviewers. The keyword title and keywords are 9pt ShinMyungjo font style and only in English.
<b>References</b>	Use the Roman subscript. References must be written in English in the order cited in the paper using the following formats: (1) Article: Authors' name, "paper title," article name, volume number, issue number, pages, month, year. (2) Books: authors' name, book name, publisher name, pages, year. (3) Conference proceeding: authors' name, "paper title," proceeding name, pages, place, country, month, year.

The manuscript can be written either in Korean or English. The titles and captions of figures and tables can also be written either in Korean or English. However, their contents should be written only in English.

► **Manuscript types: Four types of manuscripts are accepted.**

<b>Regular papers</b>	Typically, 5 pages or more in final length. The regular papers should focus on a specific and original contribution, with sufficient literature review, analysis, and results to establish its merit and potential value.
<b>Express papers</b>	Regular papers but for quick processing.
<b>Invited papers</b>	These typically address the papers that EIC or AE invites for special issues.
<b>Correspondence</b>	These usually address corrections to published papers or substantive technical discussion of papers. They are limited to two pages in the final form.

### **Fund Support**

The Journal of IEIE has been supported by the Korean Federation of Science and Technology Societies Grant funded by the Korean Government.
